Did you know... ?

Task 1:

Sourced from: Pinterest

### Spot the Difference

There are 8 differences in the pictures below, can you find them?

Task 2: Read the passage carefully and answer the questions that follow.

## Climate Change

Did You Know...? CO<sub>2</sub> is at its highest in two million years!

### What Is Climate Change?

Climate change is the process of our planet heating up. It refers to the long-term changes in temperatures and weather in a particular place. These changes usually occur over a long period of time. Scientists estimate that since the Industrial Revolution, human activity has caused the Earth to warm by one degree Celsius. While this might sound like a small change, it means big things for people and wildlife around the world.

### What Causes Climate Change?

The main causes of climate change are human activities—like cutting down forests, driving cars, creating electricity and burning fossil fuels. The process of burning fossil fuels has greatly impacted climate change. This process creates greenhouse gases which wrap a blanket around the Earth, trapping the sun's heat. The increase in greenhouse gases from human activity is making our planet unnaturally hot. Plants, soils and the oceans can absorb these dangerous gases, but they can't keep up with the amount being

produced. Some greenhouse gases stay in the atmosphere for very long periods of time, from hundreds to even thousands of years.

## Greenhouse Gases

The most common types of greenhouse gases are:

- Carbon Dioxide (CO<sub>2</sub>): The most common greenhouse gas created by human activity. Burning fossil fuels and making cement are two ways in which this gas is released into the atmosphere.
- Methane (CH<sub>4</sub>): The second most common greenhouse gas created by human activity. Most of this gas comes directly from raising livestock.

The Effects of Climate Change Warmer temperatures, changing weather patterns and disrupting the usual balance of nature over time pose many risks to both humans and wildlife. Some of these risks include:

- increased drought effect on people's health and wellbeing loss of species
- warming oceans lack of food

### What Are the Solutions?

Everyone can play a part in reducing our carbon footprint by making small changes. Some of these changes include:

- choosing cleaner ways to power our homes and cars
- turning off lights and appliances that are not in use
- planting trees
- walking or cycling if you can
- recycling and reducing food waste

Making these small changes won't erase the significant problem of climate change, but it will certainly work towards a brighter future for us and for generations to come.

**Did You Know...?** Animals, such as polar bears, may become extinct as a result of climate change.

### Glossary

**carbon footprint:** The total amount of greenhouse gases that are created by what we do.

**fossil fuels:** Coal, oil and gas are examples of fossil fuels.

**drought:** lack of rainfall over a long period of time, resulting in a water shortage.

**species:** A group of living things, such as bears or snakes.

**extinct:** When something will no longer exist; be gone forever.

1. What is climate change? Tick one.

- a. the process of our planet cooling down
- b. the process of reclaiming land from the sea
- c. the process of our planet warming up
- d. the process of planting new trees

2. By how many degrees have scientists claimed that the Earth has warmed up by since the Industrial Revolution? Tick one.

- |          |         |
|----------|---------|
| a. 0.1°C | b. 1°C  |
| c. .01°C | d. 10°C |

3. Find and copy two words which show that burning fossil fuels has had a major effect on climate change.

---

4. Fill in the missing word. The increase in \_\_\_\_\_ gases from human activity is making our planet unnaturally hot.

5. What is the name of the most common greenhouse gas?

---

6. Why do you think we should be worried about climate change?

---

7. What, in your opinion, is the most impactful effect of climate change?

---

---

---

---

8. What small steps others than those listed will you take in your home to reduce your carbon footprint?

---

---

---

**Task 3– Read the passage carefully and answer the following questions.**

**Fireflies by Faith Cormier**

What are those little green lights floating on the grass and flying in the yard?

Are they monsters? Are they UFOs?

No, they aren't monsters and they aren't UFOs. They're fireflies.

Fireflies are little insects that glow with a cool green light. If you touch one it won't burn you.

Some fireflies glow to warn other animals that they don't taste good. Frogs, bats, and birds do not like to eat animals that glow. The glow helps keep fireflies safe.

Sometimes we call fireflies glow worms.

You can catch fireflies in a jar. Don't forget to let them go again.

Answer the questions based the comprehension

1. What colour are fireflies when they glow?

---

2. Fireflies are sometimes called

---

3. If you touch a firefly, will it burn you? yes no

---

4. If you catch a firefly in a jar, you should...

---

5. When can you find fireflies?

---

**6. Write true or false.**

1. Fireflies are hot. \_\_\_\_\_
2. Fireflies are called glow worms. \_\_\_\_\_
3. Fireflies glow with a red light. \_\_\_\_\_
4. Fireflies are monsters. \_\_\_\_\_
5. Fireflies are insects. \_\_\_\_\_

7. How many words can you make from the letters in the word without repeating any letters.

**Hippopotamus**

Learning Objective: To recapitulate the concept of adjectives.

Task 4: Do as directed-

1. Choose a sentence which gives you details about the object-

- i. The train sped down the rusty tracks.
- ii. The train sped down the tracks.

2. Add adjectives in the below sentences-

iii. Melissa shared her \_\_\_\_\_snacks with her \_\_\_\_\_friends.

iv. The \_\_\_\_\_announcer presented the \_\_\_\_\_news.

v. Amy wore a \_\_\_\_\_dress to school.

3. Circle the adjectives in the story-

During Pioneers times, life was not easy. The men worked hard at removing the tall trees from their land to build their small log homes. They labored from dawn until dusk to build a solid home for their families. The women also worked hard. They planted vegetable gardens and tended to them all summer long to make sure they would have fresh food to put on the table. They washed dirty clothes by hand using square soap they made from scratch. Little children helped a lot with the easier chores. They milked the cows and collected the eggs from the chicken coop. They cleaned the filthy stable and fed the hungry animals. They completed all their daily chores before walking to school. Life as a pioneer was hard, and people worked for every bit of food they ate.

Task 5- My Daily Ten-Minute Journal for 30 Days. Answer the following questions in the morning-

- What am I looking forward to today?
- What am I grateful for today?
- What emotions am I feeling that are helping me today?
- What positive affirmation am I going to say today?

(2) Answer these questions at the end of the day.

- What was the highlight of my day?
- What was my proudest moment?
- What was my biggest achievement today?
- What positive effect did I have on other people today?
- What did I learn today?

## Answers

Task 1:

Task 2:

1. c
2. b
3. Impacted and unnaturally
4. Greenhouse
5. Carbon Dioxide (CO<sub>2</sub>)
6. Answers may vary
7. Answers may vary
8. Answers may vary

Task 3:

1. Fireflies glow with a cool green light.
2. glow worms
3. No
4. let it go.
5. Answers may vary
6. (1)false (2>true (3>false (4) false (5>true
7. Answers may vary

Task 4:

1. i
2. Answers may vary
3. Circle the adjectives in the story-

During Pioneer Times, life was not easy. The men worked hard at removing the tall trees from their land to build their small log homes.
