Mathematics – Self-help

Name: \_\_\_\_\_

Date: \_\_\_\_\_

**Learning Objective:** To strengthen understanding of multiplication

**A:** A factory packs 248 toys in one truck. 6 trucks leave the factory today. How many toys are shipped in total?

**B:** There are 409 beads in one bag. The art teacher buys 7 bags.

- a) Is the total more than or less than 2,800?
- b) Justify your answer.

**C:** Without calculating, decide which is greater and explain why:

$482 \times 4$  or  $500 \times 4$

**D:** Find a number that gives a product between 1,500 and 1,600 when multiplied by 5.  
Can you find more than one?

**E:** Riya says, " $398 \times 6 = 2,400$  because  $400 \times 6 = 2,400$ ."

- a) Do you agree or disagree? Explain what Riya missed?

## Answers

**A:**  $248 \times 6 = 1,488$  toys

**B:** a)  $409 \times 7 = 2,863$

b) More than 2,800 because  $400 \times 7 = 2,800$  and extra beads are added

**C:**  $500 \times 4$  is greater because 500 is larger than 482

**D:** Answers may vary

**E:** Disagree.

Riya estimated but did not calculate exactly.

$398 \times 6 = 2,388$ , not 2,400
