

Pathways School Gurgaon

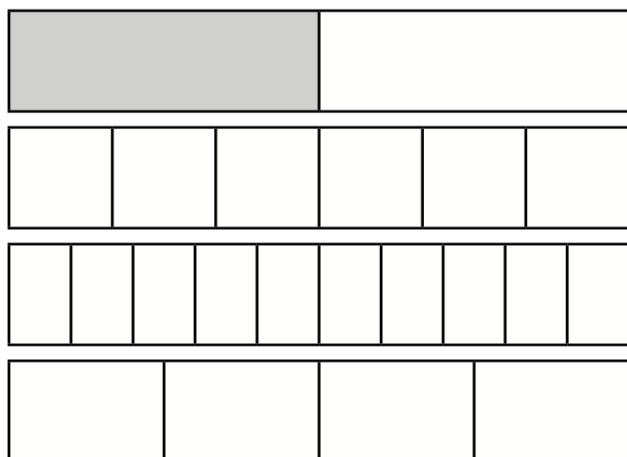

PYP 3 Mathematics

Name: _____

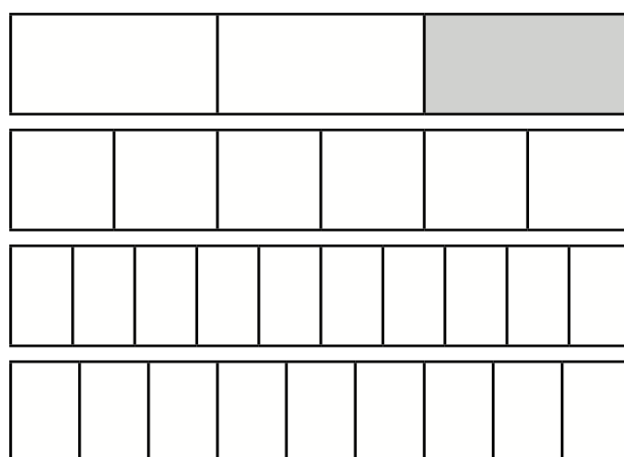

Date: _____

Learning Objective: To strengthen understanding of fractions

A: Write the equivalent fractions

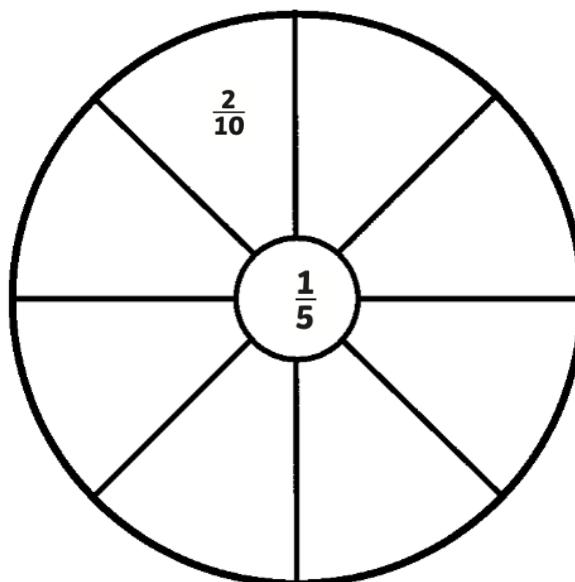

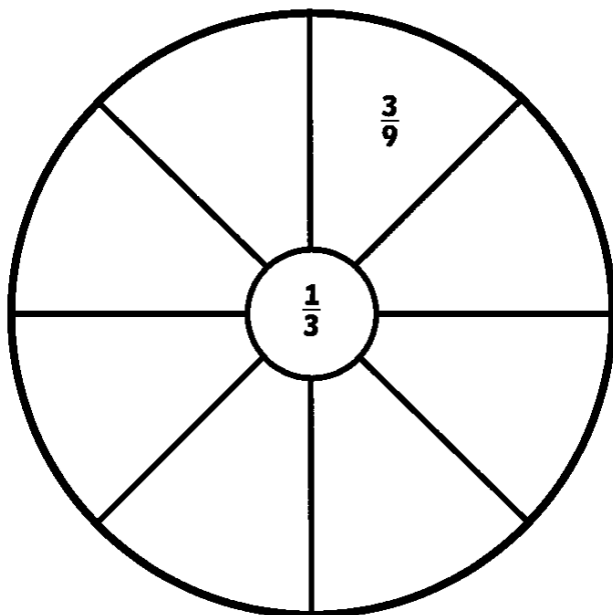

$$\frac{1}{2} =$$

$$\frac{1}{3}$$

B: Create your own equivalent fractions.

a) Which wheel could you put the fraction $\frac{5}{150}$? How? Show your working also.

b) Which wheel could you put the fraction $\frac{60}{300}$? How? Show your working also.

C: Draw a rectangle garden. (Low floor)

Show $\frac{1}{2}$ of the garden planted with flowers.

Label the fraction.

Then divide your garden into more equal parts and show the same amount in a different way.

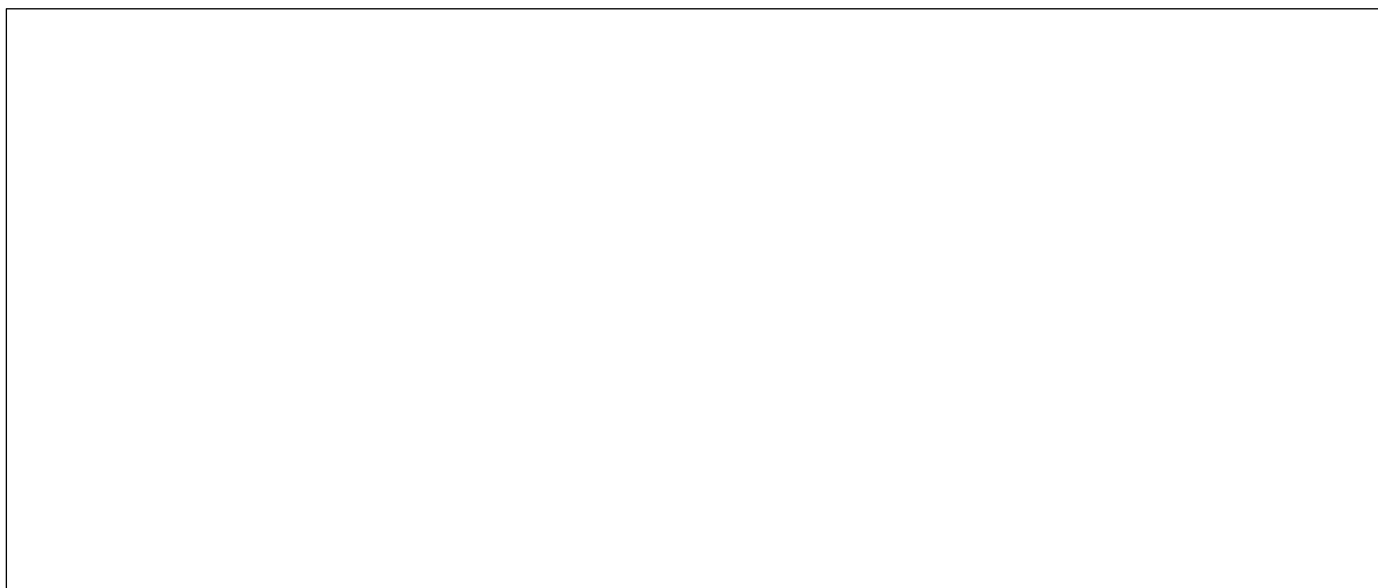

Challenge: (High ceiling)

Can you design a garden where:

- $\frac{1}{2}$ is flowers
- $\frac{1}{4}$ is vegetables
- The rest is grass

Show equivalent fractions for each part. Prove that the whole garden is still 1 (a complete whole).

Let's reflect: Which task made you think the most? Why?
