

Pathways School Gurgaon

PYP 3 Mathematics

Name: _____

Date: _____

Learning Objective: To enhance critical thinking skills

A: Choose 3 balls and add them together. You can use each ball more than once.

What is the highest score you can get?

Which balls can you add together to score?

- 7 points
- 10 points

What other scores can you get?

2 points

4 points

1 point

3 points

B: In this puzzle grid, each shape represents a different value. Calculate the value of each shape and use these to find the total of each row and column. Use different mathematical operations to solve this puzzle.

=

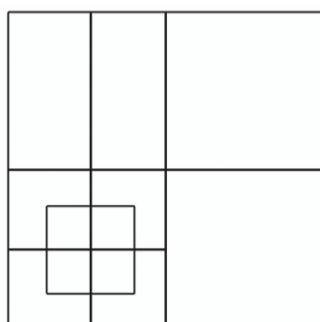

=

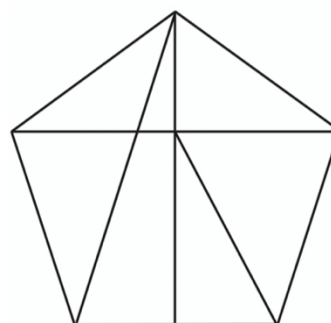

=

				22
20			28	

C: a) How many squares can you count?

b) How many triangles are there?

D: Link up any four numbers and find the total. Links can go up, down or sideways but not diagonally.
The total shown here is $5+4+19+17=45$.
Find the highest possible total.

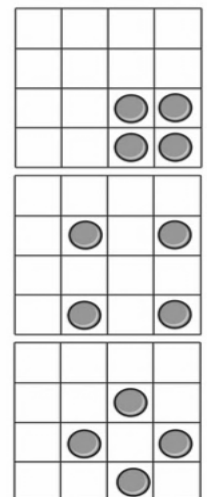

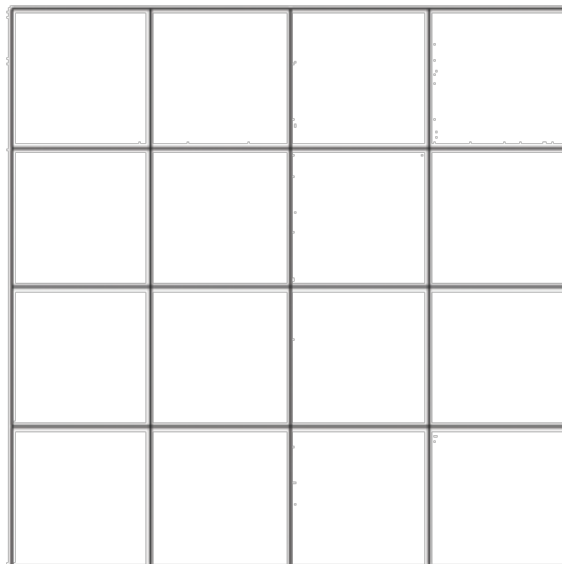

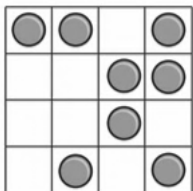

5	18	14	2
4	1	16	17
19	17	12	13
8	5	14	7

Find the lowest possible total.

Try linking five numbers. Now try linking five numbers by only using diagonal links.

Extended: In each of these grids, the counters are at the four corners of a square. What is the greatest number of counters you can put on a grid without making a square?

Here is an example

Let's reflect:

a) Which task did you find challenging? What was the another way you tried?

b) At first I thought _____,
but then I realised _____.
